

ROFID NASIF ANNAFIE

FRESHGRADUATE

South Tangerang, Banten
+6289630044947 rofidnasifannafie@gmail.com

Objective

Fullstack Developer with strong skills in PHP, Laravel, HTML, CSS, and JavaScript. Experienced in building scalable server-side applications, managing MySQL databases, and developing RESTful APIs with responsive user interfaces. Passionate about delivering secure, high-performance web applications and contributing to innovative projects.

Education and Training Program

Teknik Informatika

Institut Teknologi Indonesia

Aug 2020 - Apr 2025

As a student, my involvement on campus is not solely confined to academics; I am also active in various student activities and organizations. Through my active participation, I have been able to enhance my interpersonal skills, build valuable connections, and broaden my network.

Web Developer Program

Hacktiv8 Indonesia

Aug 2022 - Dec 2022

During my time at Hacktiv8, I learned the fundamentals of HTML5, CSS, and Javascript comprehensively. At Hacktiv8, there are 4 Capstones, and my group became the first champion in the first Capstone. Lastly, I graduated with a satisfactory grade.

AI for Gen Z Jobseekers

Synthesis Academy

Feb 2023 - Jun 2023

During my time at Synthesis Academy, I worked on a Final Project titled 'Depression Detection Application using Sentiment Analysis within the NLP domain.' My steps in creating the application included Data Acquisition, followed by Data Preprocessing, then Data Exploration, and finally, Deployment.

Big Data using Python

Digital Talent Scholarship

Jul 2023 - Aug 2023

In this activity, I learned basic Python and also studied SQL. Here, I also learned Tableau for data analysis purposes. I have successfully completed the available courses as well.

Backend Developer Intern

PT. Kensington Teknologi

Jan 2021 - Dec 2021

Developed and tested the OM-AMT Mobile API using CodeIgniter to support internal systems. Additionally, built a personal portfolio website utilizing PHP, JavaScript, Laravel, CodeIgniter, and Flask. Responsible for implementing backend logic and designing databases for various internal applications.

Organizational Experience

Academic and Research

Himpunan Mahasiswa Teknik Informatika

Mar 2022 - Mar 2025

My contributions during my tenure as a member of the academic and research team include assisting in the creation of the HMIF website, developing the Abdimas website, designing Abdimas modules, and preparing modules for the training of prospective HMIF members.
